EDUCATION

CUNY Hunter College

New York, NY | Graduated Jan 2025

Bachelor of Arts: Computer Science Minor: Applied Mathematics

- **Affiliations:** CUNY Tech Prep Fellow (Data Science & OSL), Girls Who Code (PR Lead), CodePath (Alum), Rewriting the Code (Member)
- **Relevant coursework:** Data Structures & Algorithms, Operating Systems, Cybersecurity, Web Development

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, TypeScript, JavaScript, SQL, C++

Frontend: React, HTML, CSS, GSAP

Backend: Node.js, Express.js, Django, Flask, PostgreSQL

Tools & Platforms: Git, GitHub, AWS, Firebase, GCP, Linux

Certifications: CodePath Intermediate Technical Interview Prep | Completed May 2025

EXPERIENCE

Halcyon Finance | Frontend Developer (Contract)

Remote | Jun 2025 - Present

- Spearhead the entire frontend development for a Web3 fintech platform, building a responsive and scalable UI from the ground up as the sole engineer using React, TypeScript, and GSAP.
- Collaborate with 3 founders to shape user flows, features, and deliver performant, accessible UI components.
- Engineer and integrate a multi-frame animation with AI-generated assets into a custom design system, boosting user engagement on a key landing page.

Barclays | Data Engineering Intern

Whippany, NJ | Dec 2022 - Feb 2023

- Reduced data processing time by 30% by engineering an automated credit score extraction tool in Python, streamlining data pipelines for stakeholders.
- Simplified stakeholder decision-making by enhancing financial trend analysis, developing dynamic data visualizations.

FELLOWSHIPS & TECHNICAL DEVELOPMENT

CUNY Tech Prep | Data Science & Open Source Labs Fellow

New York, NY | Jul 2024 - Jul 2025

- Contributed to an open-source Zoom attendance monitor built for CUNY Tech Prep using React, Express.js, PostgreSQL, Google Cloud Platform, reducing manual TA workload by automating attendance tracking via webhooks.
- Operated within an established CI/CD pipeline, utilizing GitHub checks to ensure quality and streamline deployment.

Google | Software Engineering Fellow

New York, NY | Jul 2023 - Oct 2023

- Solved 12+ DSA problems, and participated in weekly mock technical interviews and code reviews, improving problem-solving speed, debugging, and technical communication skills.
- Selected as 1 of 80 fellows from 350+ applicants for an intensive 12-week program.

PROJECTS

JetGenie

Hackathon Project | Feb 2025

- Developed a full-stack AI travel planner (React, Flask, Firebase) with Google Maps/Calendar API integration for geo-aware itineraries, presented to a panel of judges.
- Integrated Groq API for AI-generated activity suggestions and improved component architecture, boosting load performance by 20%.
- Conducted peer code reviews to ensure quality and consistency, reducing bugs and improving maintainability.

Hands 2 Words

Sep 2024 - Dec 2024

- Built an end-to-end full-stack web app that translates 9+ American Sign Language phrases to English in real time using a machine learning model and solely developed the Django backend, implementing REST API.
- Led a team of 5, assigning GitHub issues, setting up the development environment, and serving as liaison with the professor through weekly progress presentations.
- Engineered user progress tracking with Firebase and presented the application at a final project showcase.

LEADERSHIP

Digital Girl, Inc. | Program Administrator & Lead Instructor

Brooklyn, NY | Jan 2018 - Sep 2024

- Created 21 adaptable lesson plans and taught 700+ K-12 students and senior citizens, enhancing programming and digital literacy in Python, HTML, JavaScript, Code.org, and Scratch.
- Trained and scheduled 30+ staff members to deliver engaging programming sessions, contributing to a 25% increase in participation in underserved areas through partnerships with 10+ schools and organizations.
